

Digital Design Studio

MRUKA — DIGITAL FASHION & CREATIVE SERVICES
Capabilities overview — project-based work

DIGITAL FASHION

- 3D Garment Visualization

Turning a garment concept or reference into an accurate 3D render, for lookbooks, decks, or e-commerce.

- Digital Pattern Check & Correction

Reviewing a garment's digital pattern for fit and construction issues before it moves to production.

- Collection Design in 3D

Developing a full garment collection digitally, from concept through simulated final form.

- Garment Fall & Fabric Simulation

Simulating how a specific fabric moves and falls on a garment, for accuracy before physical sampling.

- Virtual Fashion Walk Simulation
- Simulating a garment in motion on a walking figure, for runway-style presentation.

- 360° Garment Visualization

Full-rotation renders of a garment for product pages, pitch decks, or client review.

- Custom Garment Animations & Renders

Animated or still renders built to a specific brief and format.

- Digitization of Physical Garments

Rebuilding an existing physical garment as a 3D digital asset, from reference photos and measurements.

- CG Garment Modeling & Simulation

Garment modeling and simulation for film, commercials, or visual effects work.

- Garment Simulation for Character Animation

Cloth simulation built to work correctly with an animated character rig.

- 3D Garment Commercials

Short-form commercial content built around 3D garments and fabric.

- Cloth Simulation, Beyond Garments

Simulation for flags, carpets, curtains, sheets, and other fabric-based objects, including custom requests.

Digital Design Studio

DIGITAL STUDIO — ADDITIONAL CAPABILITIES

- Logo Design and Animation

Customized Logo design and animation following the requrements of the client

- AI-Generated Visuals (Image / Video)

AI-assisted image and video content for concepting, mood boards, or supplementary visuals.

- Architectural Floor Plans & 3D Renders

2D floor plans and 3D architectural visualization for interior or spatial projects.

- 3D Modeling

General-purpose 3D modeling outside of garment work, built to specification.

- 3D Environments (Games / Unreal Engine)

Real-time 3D environments built for games or virtual production.

- Website Design & Build

Website design and build, from concept through a live site.

- Motion Graphics (2D & 3D)

Motion design for titles, explainers, or promotional content.

- Film & Video Editing

Editing for short-form film, commercial, or promotional video.

HOW WE WORK

MRUKA takes on project-based freelance work. Every engagement starts with a clear brief and ends with a fixed deliverable. Pricing and turnaround are quoted per project.
